

This complaint is regarding the renewal of FM broadcast license to Crain Media Group, LLC for FM radio station KKSX in Bald Knob, Arkansas.

In my opinion and several others, Crain Media Group is incompetent to manage and operate FM radio station KKSX for the following reasons First, frequently during late night broadcasting, this station airs commercial advertising, music, and DJ chatter simultaneously as if they are not even aware it is occurring. This has been going on now for approximately 4 months unresolved. Not only is this a nuisance to the listening public, but is also unfair to those advertisers who have paid for exclusive ads during these times. Second, Crain Media Group has effectively reduced the quality and diversity of our local FM broadcasting since entering the local market. Complaints made to the station have gone unanswered and their problems have gone uncorrected for quite some time. It is for these reasons that I feel their request for license renewal should be denied.
